

ALL NEW FAMILY BUNKIE LAUNCHES AT QUEENSLAND SHOW

See the all new **FAMILY BUNKIE** at the Queensland Caravan Camping and Touring Supershow being held at the RNA Showgrounds Brisbane from June 7 to 12. Great value at only \$54990 no more to pay

The Crusader **Bunkie** is designed with the family in mind and there is no better time to create those magical family memories that will live with you and your children for ever, the happy moments toasting marshmallows around the campfire, frolicking on beaches and beside rivers, the fun and laughter from a time that can very quickly get away.

The Bunkie weighs around 1980kg so it is perfect to be towed behind a Prado or other vehicles with limited tow ratings and the payload of the Bunkie is as much as 750kg, that's a lot of bikes, toys and other family treasures.

Crusaders Family Bunkie combines a composite roof and floor with a Duratech 6" Australian steel box section chassis with eye to eye tandem axle suspension – all equating to strength and durability.

The **Bunkie** is the perfect example of the thick fully insulated hail resistant roof which extends from the front checker plate over to the rear checker plate, one piece meaning no roof joins. The one piece composite floor is 42mm thick and offers dense insulation properties against cold or heat creep from the ground and the fibreglass skin under the floor acts as a barrier and offers protection from water and road debris. The side walls sit on top of the floor, and the roof sits on top of the walls thus creating a total load sharing structure.

Add to this impressive structural design, Crusaders use of full width piano hinges, checkerplate on the front, rear and the sides, wall studs spaced every 250mm, furniture screwed in from the outside and higher grade electrical wiring over industry standard. Crusaders new **Bunkie** is backed by Crusaders peace of mind two year national factory warranty.

Designed with higher (80") ceilings than most other caravans, loads of LED downlights, gloss finish on the ceiling and the cupboards and the largest windows available, the Bunkie feels nice, spacious and liveable. The fully insulated body together with reverse cycle air conditioning and the large, shady roll out awning offer relief from extreme temperatures.

But it's not just about strength, it's also about luxury and the **Bunkie**, for its price, is the best equipped bunk caravan on the market today. The list of standard features seems endless and includes a queen size bed with innerspring mattress or opt for

single beds if you wish. The children are not forgotten as the Bunkie has three bunks as standard, great for the large family or if a friend comes along and each of the bunks also have an innerspring mattress, a reading light, 12v power and window. Including the lounge, the Bunkie can sleep six quite comfortably.

The 100ah deep cycle battery, 25amp charger and a solar panel can power the myriad of LED down lights that brightly illuminate the caravan, the TV / DVD combo, the blue tooth CD radio and the water pump if you are away from a 240v supply.

A large lounge accommodates the family for dinner and the well equipped kitchen with stylish rolled benchtops, usually only found on expensive caravans, has a cooktop with three gas and one electric hotplate, microwave oven, a two door multi energy refrigerator, drainer sink, flick mixer taps and of course hot and cold running water from the two 95 litre water tanks.

The bathroom offers a full height fibreglass shower, a flushing toilet and a vanity bowl, top loading washing machine and a wind up vent with exhaust fan. The hot water system operates on either electricity or gas, turned on at the flick of a switch.

Upgrade your Bunkie into a multi terrain caravan with our **discounted X Country upgrade bundle** which offers fully independent suspension with shock absorbers, dirt eating 16" chunky tyres, the silver/grey look with black checkerplate, a tool box and jerry can holders on an extended A frame, a superior DO35 coupling, a pressure dust vent and more.

30mm thick one piece insulated composite roof

42mm thick composite floor compared to most others

KEY FEATURES AND SPECIFICATION

Length:	19' internal length, 26'7" travel length including bumper bar and spare
Weights:	ATM 2600kg, Tare 1980kg*, Ball 140kg* (*approximate and can vary)
